OBJECTIVE

Motivated Data Science undergraduate seeking an entry-level role in data analytics or web development. Eager to apply skills in Python, SQL, Power BI, and web technologies to solve real business problems and contribute to a growth-oriented team.

EDUCATION

BSc Data Science and Analytics

Bharathiar University | 2023 – Present

SKILLS

Programming: Python, SQL, R, C, HTML5, CSS3, JavaScript

Data Tools: Power BI, Tableau, Microsoft Excel, Google Colab

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, NLTK

Web Development: Responsive Web Design, GitHub Pages

Core Skills: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Dashboard Development, KPI Tracking, Business Intelligence

Other Tools: Git, GitHub, VS Code

INTERNSHIP

Data Analytics Intern | CODTECH IT Solutions Pvt. Ltd (Virtual) | Dec 2024 – Jan 2025

- Cleaned and preprocessed real-world datasets to prepare them for analysis.
- Built interactive dashboards to present business insights and support reporting.
- Performed trend analysis and KPI tracking to assist decision-making.

FREELANCE EXPERIENCE

Freelance Data Analyst and Web Developer | Self-Employed | Aug 2025 – Present

- Built Power BI dashboards for sales trends, regional demand, and customer behavior analysis.
- Developed a responsive e-commerce website for a local brand using HTML5, CSS3, and JavaScript.
- Conducted customer survey analysis and EDA using Python and Excel for a food brand client.
- Provided data-driven recommendations on pricing and marketing strategy to small business clients.

PROJECTS

Mr Delights – E-commerce Website | Tech: HTML5, CSS3, JavaScript, GitHub Pages

| [Live Link](#)

- Built a fully responsive e-commerce website for a Kerala-based dates and nuts brand.
- Features include product catalog, shopping cart, and WhatsApp-based ordering system.

Prosa Protein Batter – Market Analysis | Tech: Python, Excel, Power BI [| Link](#)

- Analyzed customer survey data and created Power BI dashboards for demographics and regional demand.
- Delivered insights to improve pricing strategy and retail targeting for the client.

US Election Sentiment Analysis | Tech: Python, NLTK, Scikit-learn, Pandas [| Link](#)

- Built an SVM-based model to classify sentiment from Twitter data related to the US election.

E-commerce Sales Analysis | Tech: Python, Pandas, Matplotlib [| Link](#)

- Analyzed sales and revenue trends and built interactive visualizations to track business performance.

Titanic Survival Prediction | Tech: Python, Pandas, Scikit-learn [| Link](#)

- Trained Logistic Regression and Random Forest models to predict passenger survival.

GridSense – Home Energy Analytics Platform | Tech: Python, Streamlit, Scikit-learn, Plotly [| Link](#)

- Developed an AI-powered energy analytics platform to predict electricity consumption and detect anomalies using machine learning models like Random Forest and Isolation Forest.
- Built interactive dashboards for energy monitoring, appliance-wise analysis, cost estimation, and energy-saving recommendations using Streamlit and Plotly.

CERTIFICATIONS

- Data Visualisation: Empowering Business with Effective Insights – Tata Group, Forage
- Data Analytics with Python – NPTEL
- Data Analytics Job Simulation – Deloitte Australia, Forage
- Introduction to AI and Vector Search – MongoDB
- Advanced Excel with Data Analytics – E and ICT Academy, IIT Kanpur
- Introduction to MS Excel – SimpliLearn
