OBJECTIVE

Data Analytics fresher with hands-on experience in Python, SQL, Excel, Power BI, and Tableau. Skilled in data cleaning, dashboard creation, KPI reporting, and exploratory data analysis. Built multiple analytics projects involving sales analysis, customer insights, and business reporting. Seeking an entry-level Data Analyst role to support data-driven business decisions.

EDUCATION

BSc Data Science and Analytics

Bharathiar University, Coimbatore | 2023 – 2026

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, KPI Reporting, Dashboard

Tools: Power BI, Tableau, Microsoft Excel, SQL, Python, Google Sheets

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Database: MySQL

Other Tools: Git, GitHub, VS Code

INTERNSHIP

Data Analytics Intern | CODTECH IT Solutions Pvt. Ltd (Virtual) | Dec 2024 – Jan 2025

- Cleaned and transformed structured datasets using Python and Excel for analysis.
- Built interactive Power BI dashboards to track KPIs and business trends.
- Conducted exploratory data analysis to identify actionable insights.
- Generated reports supporting data-driven decision-making.

FREELANCE EXPERIENCE

Freelance Data Analyst | Self-Employed | Aug 2025 – Present

- Conducted customer survey analysis and EDA using Python and Excel for a food brand client.
- Provided data-driven recommendations on pricing and marketing strategy to small business clients.

PROJECTS

Prosa Protein Batter – Market Analysis | Tech: Python, Excel, Power BI

[| Link](#)

- Analyzed customer survey data and created Power BI dashboards for demographics and regional demand.
- Delivered insights to improve pricing strategy and retail targeting for the client.

US Candy Distribution Analysis | Tech: Python, Pandas, Scikit-learn, Power BI

[| Link](#)

- Built a Power BI dashboard to analyze sales, profits, factory performance, and customer locations using Python and Power BI.
- Performed shipping route optimization to identify cost-saving opportunities and improve supply chain efficiency.

Customer Behavior Analysis Dashboard | Tech: Python, Pandas, Power BI

[| Link](#)

- Analyzed customer shopping data using Python and Power BI to uncover purchasing behavior, revenue trends, and customer retention opportunities.
- Designed an interactive dashboard with KPIs and visualizations to support data-driven business decision-making.

GridSense – Home Energy Analytics Platform | Tech: Python, Streamlit, Scikit-learn, Plotly

[| Link](#)

- Developed an AI-powered energy analytics platform to predict electricity consumption and detect anomalies using machine learning models like Random Forest and Isolation Forest.
- Built interactive dashboards for energy monitoring, appliance-wise analysis, cost estimation, and energy-saving recommendations using Streamlit and Plotly.

US Election Sentiment Analysis | Tech: Python, NLTK, Scikit-learn, Pandas

[| Link](#)

- Built an SVM-based model to classify sentiment from Twitter data related to the US election.

Titanic Survival Prediction | Tech: Python, Pandas, Scikit-learn

[| Link](#)

- Trained Logistic Regression and Random Forest models to predict passenger survival.
